

Balony Hoist System Sketch

not too much

Balancing Hoist System To Bo

Scouting

- Is this force secure? Should there also be a supporting counterweight that opposes the axis of rotation

Materials

Measurements for the components below

Simple + end caps + ?	Component 1: Main support beam (L:	W:	H / Thickness:
	Component 2: Main connector / Spine (L:	W:	H:
	Component 3: Foot board (L:	W:	H:
	Component 4: PVC support rails (L:	W:	H:
	Component 5: Platform (plywood) (L:	W:	H:
Component 6:			
Shut supports between:			
> 1 → 2 (start & middle)			
> 2 → 3			
> Counterweights? → cement blocks			
thick → informs thin			
- rope (calculate length later) - grapple cable (calculate L) - wheel on 1 axis OR Pulley & 2 thick screws (long & short) - M8x5 add support rods			

Assembly

Butter:

- hole saw ~~W~~
- ~~What's going on~~
- PVC glue
- small
- Drill
- Impact Drill
- Screwdriver

Build it!!
