Zone 7 – Vegetable Planting Calendar Guide

Zone 7 has medium length growing season. Most vegetable varieties will have no problem maturing before your first frost date. With a last frost date of April 15th and first frost date of November 15th. This gives you 7 months of gardening time! These dates will vary a week or two so it's important to watch the weather before planting. Annual minimum temperature for zone 7 is 5°F.

Zone 7 Hardiness Dates

Last Frost Date	First Frost Date
April 15	November 15

Use your last and first frost dates to calculate your planting schedules.
